

B SQUARE HYDRO TECH

Advanced Electrolytic Water Conditioning

HIGH-EFFICIENCY SCALE REMOVER

B Square Hydro Tech offers a revolutionary chemical-free and salt-free solution to eliminate hard water scaling in residential and industrial environments.

By using precise electrolysis, our system disintegrates the molecular structure of hardness compounds, ensuring your pipes and appliances remain clean and efficient.

TECHNICAL FEATURES

Advanced Titanium Substrate: High-grade titanium anode for long-term durability.

Platinum Group Oxide: Specialized coating ensures high electrolytic efficiency.

Energy Efficient: Low power consumption designed for 24/7 operation.

Non-Corrosive SS 304: Internal chamber built with premium 304 stainless steel.

Eco-Friendly: No salt or chemicals required; uses naturally present chlorides.

Easy Retrofit: Plug & play installation for any existing water line.

WHY CHOOSE B SQUARE HYDRO TECH?

✓ Results-Oriented

✂ Scale Removed

⊘ No Chemicals

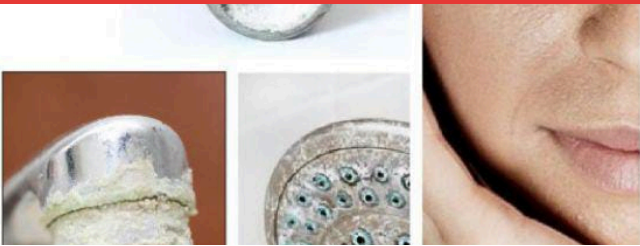

✂ Low Maintenance

🔧 Proven Tech

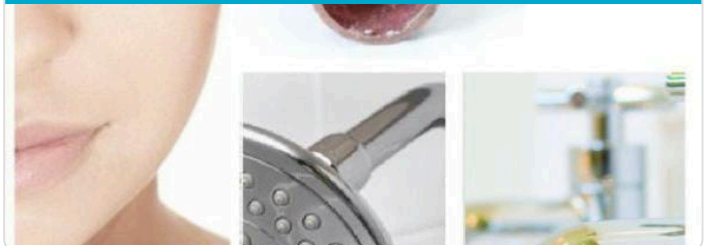

📦 One-Time Investment

WATER TRANSFORMATION RESULTS

B-SQUARE TREATED

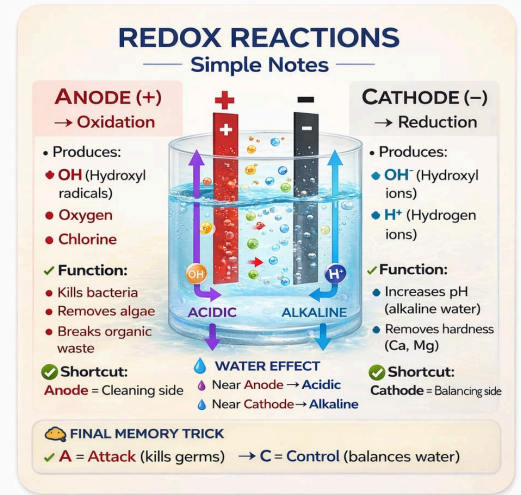

SYSTEM BENEFITS & SUPPORT

Industrial Strength Solutions

SYSTEM BENEFITS

- ✔ **Infrastructure Protection:** Prevents scale buildup in pipelines and overhead tanks.
- ✔ **Appliance Longevity:** Enhances lifespan of Geysers, RO, and Washing Machines.
- ✔ **Cost Savings:** Massive reduction in monthly maintenance and repair bills.
- ✔ **Mineral Retention:** Keeps healthy essential minerals in your drinking water.

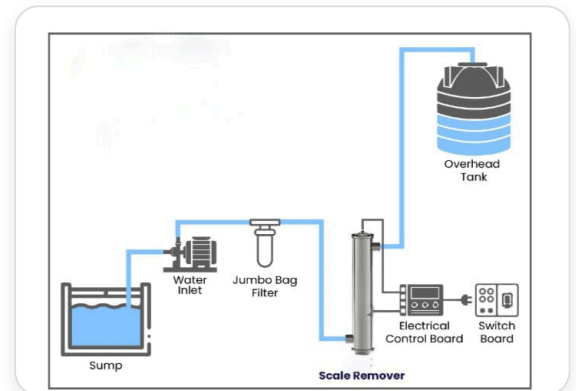

INSTALLATION & CARE

Simple Integration: B Square Hydro Tech units are designed for easy, "Plug & Play" installation into your main water inlet line or before the overhead tank.

Periodic Cleaning: A portion of the inactivated scale accumulates within the stainless steel chamber. To maintain peak efficiency, this chamber should be periodically opened and cleaned.

Durability: With no moving parts and a high-grade titanium anode, the system provides long-term, trouble-free service.
